

Top Clean HIGH for Extreme and Heavy Load

Thanks to 2.5 mm of wall thickness, the 42 mm profiles in this Top Clean variant are ideally suited for areas with heavy traffic. We recommend this system for entrance areas with a frequency of more than 5,000 crossings per day. Robust material characteristics make the durable Top Clean HIGH profile system a particularly economic solution. Cassette brushes and rubber profiles provide highly effective dirt collection. Sound-absorbing, dimensionally stable, rollable and easy to clean. Available in any width and length. Special shapes at extra charge.
